CONTENTS

**Number 1, Jan/Feb 1987**

1 Case Report: Extensive extrapontine and central pontine myelinolysis associated with correction of profound hyponatraemia
*A. P. Boon and A. E. Potter*

11 Monoclonal antibody to aldolase C: a selective marker for purkinje cells in the human cerebellum
*J. A. Royds, J. W. Ironside, S. O. Warnaar, C. B. Taylor and W. R. Timperley*

23 Nuclear and nucleolar damage in adriamycin-induced toxicity to rat sensory ganglion cells
*J. B. Cavanagh, K. Tomiwa and P. M. G. Munro*

39 Neuronotoxicity of axonally transported toxic lectins, abrin, modeccin and volkensin in rat peripheral nervous system
*R. G. Wiley and F. Stirpe*

55 The toxicity and neuropathology of dimethylethyltin and methyldiethyltin in rats
*W. N. Aldridge, R. D. Verschoyle, C. A. Thompson and A. W. Brown*

71 Future meetings of the British Neuropathological Society

73 Book reviews

**Number 2, Mar/Apr 1987**

77 Annotation. An animal model of cerebral aneurysms
*F. Hazama and N. Hashimoto*

91 Alzheimer's disease: paired helical filaments and cytomembranes
*E. G. Gray, M. Paula-Barbosa and A. Roher*

111 Selective infections of olfactory and respiratory epithelium by vesicular stomatitis and Sendai viruses
*B. Lundh, K. Kristensson and E. Norrby*

123 The topographical distribution of senile plaques and neurofibrillary tangles in the brains of non-demented persons of different ages
*D. M. A. Mann, C. M. Tucker and P. O. Yates*

141 Periventricular lesions in multiple sclerosis: their perivenous origin and relationship to granular ependymitis
*C. W. M. Adams, Y. H. Abdulla, E. M. Torres and R. N. Poston*

153 Book reviews

157 Announcements

159 Future meetings of the British Neuropathological Society

**Number 3, May/June 1987**

161 Annotation. A unifying concept on the pathogenesis of brain oedemas
*F. Joó*

177 Neurotoxicity in primary sensory neurons of adriamycin administered through retrograde axoplasmic transport in rats
*A. Kondo, A. Ohnishi, H. Nagara and J. Tateishi*

193 Triphenyl phosphite neuropathy differs from organophosphorus-induced delayed neuropathy in rats
*B. Veronesi and C. Dvergsten*

209 Brain damage in non-missile head injury secondary to high intracranial pressure
*D. I. Graham, A. E. Lawrence, J. H. Adams, D. Doyle and D. R. McLellan*

219 Response of fetal and neonatal rat brain to injury
*I. E. Moore, J. M. Buontempo and R. O. Weller*

229 Proceedings of the seventy-second meeting of the British Neuropathological Society held at the National Hospital for Nervous Diseases, London 15–16 January 1987

240 Future meetings of the British Neuropathological Society

**Number 4, July/Aug 1987**

241 Annotation. Do human T-lymphotrophic viruses (HTLVs) and other enveloped viruses induce autoimmunity in multiple sclerosis?
*A. G. Dalgleish, J. K. Fazakerley and H. E. Webb*

251 Vascular permeability in transplantable murine gliomas: morphological correlation with tracer studies
*M. M. Pires, G. J. Pilkington and P. L. Lantos*

263 Lectin binding in meningiomas
*R. Kleinert and H. Radner*

273 Dysontogenetic brain tumours—proposal for an improved classification
*G. F. Walter and R. Kleinert*

289 Studies on the neurobiology of vitamin E (alpha-tocopherol) and some other antioxidant systems in the rat
*M. A. Goss-Sampson and D. P. R. Muller*

297 The morphology and morphometry of the normal human tibialis anterior muscle
*T. R. Helliwell, J. Coakley, P. E. M. Smith and R. H. T. Edwards*

309 Case report. 'Expanding cerebral lacunae' in a hypertensive patient with normal pressure hydrocephalus
*C. Derouesné, F. Gray, R. Escourolle and P. Castaigne*

**Number 5, Sept/Oct 1987**

321 Editorial
*J. B. Cavanagh*

323 Homage to Professor J. Z. Young, FRS on his eightieth birthday
*P. K. Thomas*

327 Antigenic expression by cells derived from human gliomas does not correlate with morphological classification
*P. G. E. Kennedy, B. A. Watkins, D. G. T. Thomas and M. D. Noble*

349 Neuropathology and neurovirulence of canine distemper virus plaque isolates in the hamster
*I. V. Allen, S. L. Crosby, J. Kirk, S. J. Martin and S. Dinsmore*

371 1, 3-Dinitrobenzene-induced encephalopathy in rats
*M. A. Philbert, C. C. Nolan, J. E. Cremer, D. Tucker and A. W. Brown*

391 Case report. Sinus histiocytosis with massive lymphadenopathy presenting as a meningioma
*M. P. Carey and C. P. Case*

399 Book reviews

401 Report of a meeting. International Neurotoxicology Association, Lunteren, The Netherlands 10–16 May 1987
*J. B. Cavanagh*

403 Future meetings

**Number 6, Nov/Dec 1987**

405 Muscle morphometry in motor neuron disease
*M. M. Q. Froes, F. Kristmundsdottir, M. Mahon and W. J. K. Cumming*

421 An immunohistological study of the germinal layer in the late gestation human fetal brain
*S. J. Gould and S. Howard*

439 Kinetics of the human medulloblastoma cell line, D283 Med, maintained in an organ culture system. Autoradiographic study after cumulative labelling *in vitro*: similarities to the kinetics of human medulloblastoma *in situ*
*Y. Nakagawa, M. M. Herman, J. C. Boyd and L. J. Rubinstein*

451 Macrophage populations associated with multiple sclerosis plaques
*M. M. Esiri and M. C. Reading*

467 Immunohistochemical characteristics of haemangiopericytic meningiomas: comparison with typical meningiomas, haemangioblastomas and haemangiopericytomas from extracranial sites
*T. H. Moss*

481 Case report. Pleomorphic xanthoastrocytoma in a 62-year-old male
*J. M. Mackenzie*

489 Proceedings of the seventy-third meeting of the British Neuropathological Society jointly with the Pathological Society of Great Britain and Ireland
